Industry Skills

- Six Sigma Green Belt Certified
- Computer Aided Engineering (CAE) – ANSYS Fluent, DualSPHysics, Thermal Desktop, and Converge.
- Computer Aided Design (CAD) – SolidWorks, CREO, and Fusion 360.
- Programming – UDF DevOps, MATLAB, VBA, C#, C++, Fortran, JavaScript, Python, and OpenMPI.
- HPC Linux Clusters – Kong, XSEDE Bridges, Stheno, Wulver GPU, SwRI HPCs and Azure HPC.

Work Experience

Mechanical and Aerospace AI Contractor, May 2026 – Present **Mercor Intelligence**

- Developed training data for large language models by formulating coding problems that models could not resolve and subsequently documenting the correct solutions.
- Maintained high accuracy and throughput in large-scale annotation workflows, contributing to reliable training data for AI model fine-tuning.

Propulsion Engineer, August 2024 – January 2026 **Southwest Research Institute (SwRI)**

- Designed and came up with thruster profiles that target favorable fluid orientations during micro-gravity operations at low-Earth orbit and deep space near/on the moon.
- Participated in and led testing campaigns to go over experimental matrices to understand fluid behaviors pertaining to the aerospace sector mainly sloshing.
- Conduct Computational Fluid Dynamics simulations for various aerospace clients towards predicting ullage behavior for NTO, MONx and MMH tanks.

Education

Master of Science in Mechanical Engineering (MS), 2 Years
New Jersey Institute of Technology

Graduated

Master of Engineering in Mechanical Engineering (MEng), 4 Years
Lancaster University

Graduated
